South of this land lay large islands in what is now northern Wisconsin, and in the Adirondack region; a long ridge of land extended down the eastern edge of the present Appalachian Mountains; there was also a small island in southeastern Missouri, and perhaps one in the southern part of Illinois. (Fig. 5.) Illinois at that time lay at the bottom of the shallow sea extending between Isle Wisconsin and the Missouri isle, and was continually receiving detritus which later formed limestones. Near the land broad zones of sand were being worked over by waves and undertow, forming beds of future sandstones which dipped off toward the deeper sea. These sandstones are now great reservoirs, bringing the rain water from Wisconsin and Missouri down the dip to Illinois, and making possible our artesian wells. Although this sea was being filled all the time, yet it was many millions of years before there was dry land...
