Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Endocrine Therapeutics Practical Suggestions Our recently gained knowledge of the endocrine glands, their secretions and their functions, has opened up entirely new vistas of life and its controlling directing mechanism. This knowledge is, of course, rudimentary, but already we perceive a new science of therapeutics, physiological and rational in its conceptions and actions: this new science fulfils also the original meaning of therapeutic in that it includes the prevention as well as the cure of disease, the way of health, the way of life versus death. Of late years we have been worshipping the power of the will, and have been concentrating perhaps too much on the development of that power; often, it must be confessed, with happy results. In doing this we have been tempted to neglect the marvellous power and scope of the vegetative system. Our will directs our movements, and to a large extent our thoughts and actions, but the great laboratory work of life, silent and almost unseen, is carried on outside will and even outside consciousness.
