

Theory of Quantum and Classical Connections in Modeling Atomic, Molecular and Electrodynamical Systems

By Alexandru Popa

Oxford Elsevier LTD Okt 2013, 2013. Taschenbuch. Book Condition: Neu. 228x154x10 mm. Neuware - Quantum and Classical Connections in Modeling Atomic, Molecular and Electrodynamical Systems is intended for scientists and graduate students interested in the foundations of quantum mechanics, and on the other to applied scientists interested in accurate atomic and molecular models. This is a reference to those working in the new field of relativistic optics, in topics related to relativistic interactions between very intense laser beams and particles, and is based on 30 years of research. The novelty of this work consists of accurate connections between the properties of quantum equations and corresponding classical equations used to calculate the energetic values and the symmetry properties of atomic, molecular and electrodynamical systems, as well as offering applications using methods for calculating the symmetry properties and the energetic values of systems and the calculation of properties of high harmonics in interactions between very intense electromagnetic field and electrons. 72 pp. Englisch.

Reviews

Good eBook and helpful one. It really is written in straightforward words and phrases and never confusing. I am just effortlessly could possibly get a enjoyment of looking at a published book.

-- **Romaine Rippin**

The book is great and fantastic. it absolutely was written very properly and beneficial. It is extremely difficult to leave it before concluding, once you begin to read the book.
