

Childhood-onset Eating Problems: Findings from Research

By Claudine Fox, Carol Joughin

The Royal College of Psychiatrists. Paperback. Book Condition: new. BRAND NEW, Childhood-onset Eating Problems: Findings from Research, Claudine Fox, Carol Joughin, In recent years, eating problems in childhood and adolescence have become a major public health issue. Problems at this stage in the life course have a huge potential impact on the growth and development of the child and cause high anxiety for parents and carers. It is only relatively recently that children with eating problems have come to be regarded as a subgroup. Literature on all aspects of eating problems that specifically relates to children is limited, little is known about the nature, type and long-term outlook of the different disorders found and there is confusion in terms of classification. This report therefore aims to provide a resource collating current information on eating problems in children in order to highlight the current understanding and position of research within the field. The report is primarily concerned with children between the ages of 5 and 12 years; however, there is no definitive age at which children can suffer from the eating problems described. It does not include issues relating to failure to thrive in infancy, and although eating problems in preschool...
