Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1881 Excerpt: .mass is a triangular pyramid, the C. G. of which is found by joining g the C. G. of the triangle with B, and taking G, so 1 through G is parallel to B c, and divides C g in the same proportion as B g; hence  $C O = \frac{5}{10} g = \text{of. of } C A = \frac{1}{2} C A$ . By 82 this is also true when the triangle is vertical. 86. To find the centre of pressure of a triangle immersed in a fluid, with its base horizontal and its apex in the surface. Let A M N be the triangle. The superincumbent fluid is a pyramid with rectangular base, and its C. G. is found by joining g the C. G. of the base with A and taking g  $G = \frac{1}{3} g A$ . Let B c be the vertical through g, and G o the vertical through G, then G O is parallel to g C and g G: g A:: CO: CA; consequently  $C O = \frac{1}{3} C A$ . 87. To find the centre of pressure of a rectangle totally immersed in a fluid, with two sides horizontal at a depth below the surface. Let Pqhs be the rectangle, and p g r s its projection by vertical lines on the surface. The superincumbent mass may be divided into a rectangular prism D E, the C.G. of which is over the middle point M of A c, and a triangular prism D Q, the C. G. of which is over N, such...
