

Point Estimation of Root Finding Methods

By Miodrag Petkovic

Springer. Paperback. Book Condition: New. Paperback. 210 pages. Dimensions: 9.2in. x 6.1in. x 0.6in. This book sets out to state computationally verifiable initial conditions for predicting the immediate appearance of the guaranteed and fast convergence of iterative root finding methods. Attention is paid to iterative methods for simultaneous determination of polynomial zeros in the spirit of Smales point estimation theory, introduced in 1986. Some basic concepts and Smales theory for Newtons method, together with its modifications and higher-order methods, are presented in the first two chapters. The remaining chapters contain the recent authors results on initial conditions guaranteing convergence of a wide class of iterative methods for solving algebraic equations. These conditions are of practical interest since they depend only on available data, the information of a function whose zeros are sought and initial approximations. The convergence approach presented can be applied in designing a package for the simultaneous approximation of polynomial zeros. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
